BUILDING	ROOM NO.	
REMARKS:		
<p>Herewith copies of the Clark Cto supplemental material for your office and your division chiefs. This material may be made available to any of your people who you think needs the information, but is not intended for general circulation in units. Suggestions (in case we should have to do something like this again) are requested, particularly those leading to better answers to these two questions: why is what we do vital (or at least extremely important to the interests of the US? why is ORR the best place in the Gov't for these particular functions?</p>
